

The complete system of emergency phone called "AMIGO" is a programmable phone dialler for lifts complying with all European norms. It offers the capability of the two-way communication between the lift and an external receiver.

- Available configurations of the emergency phone:
- i. Phone unit only in the car lift ("Monophony")
 - ii. Phone units in the car lift, over the car and below the car ("Triphony")
 - iii. Phone units in the car lift, bottom of the elevator, machine room and intercom system ("Quadriphony")
